

GMP Production Scientist

Job Summary:

An exciting opportunity has arisen within RoslinCT to employ a GMP Production Scientist based at Edinburgh BioQuarter.

Main Function:

The position will be within the Manufacturing team responsible for delivery of Cellular Therapy Manufacturing Projects. The GMP Production Scientist will be responsible for performing production activities for the company's contract manufacturing operation to support the delivery of a range of cellular therapy products on a timely basis, meeting all the required quality and regulatory standards and developing the service in line with clinical and customer needs.

Specific Responsibilities

- As a member of the Manufacturing team, performing the manufacture of Cellular Therapies and Advanced Therapy Medicinal Products (ATMPs) according to Good Manufacturing Practice within a controlled clean room environment
- Complete quality related documentation including batch production records, change controls, incidents/deviations and risk assessments in accordance with GMP and standard operating procedures
- Support with the daily Manufacturing housekeeping activities, including but not limited to cleaning, stock control and ordering materials
- Preparation and maintenance of Standard Operating Procedures
- Prepare formal documentation for new projects to enable developments to be introduced in a suitably controlled manner
- Ensure that confidentiality of all information relating to clients and patients is maintained at all times
- Communicate procedures and results with clients
- Demonstrate excellent customer service skills for both internal and external customers
- Plan and undertake the Validation of new Manufacturing processes and equipment
- Compliance with all Health and Safety policies and procedures
- Providing out of hours cover for critical equipment alarms as required on a rotational basis.

Qualifications Required:

The post holder should possess a Life Sciences Degree, or a related subject, or equivalent training and experience.

Skills/Experience Required:

The ideal candidate will also have:

- Experience of working within a GMP clean room production environment
- A background in stem cells, cellular therapies or cell banking

- Experience in effectively communicating with customers
- A working knowledge of UK laws and regulations for cell therapy products and tissue donation
- Excellent computer skills with experience in Microsoft Word and Excel

The successful candidates for this role will be able to demonstrate:

- Excellent attention to detail with a desire to continually develop and improve our processes
- The ability to work effectively within a small team
- Ability to learn and share your knowledge with the development team and the wider team where appropriate
- A determination to succeed with a "can do attitude"
- Emotional resilience and an ability to work under pressure
- Flexibility and enthusiastic, with a passion for clean room work
- Excellent communication and interpersonal skills
- Exceptional organisational and time management skills
- Ability to work to deadline and deliver results

To apply, please send your CV, a covering letter with your salary expectation and confirmation you have the right to work in the UK to jobs@roslinct.com
